---

⑤ Cleaning (Remove Glass compound )

⑥ Base coat

⑦ Coating

# Completion photo

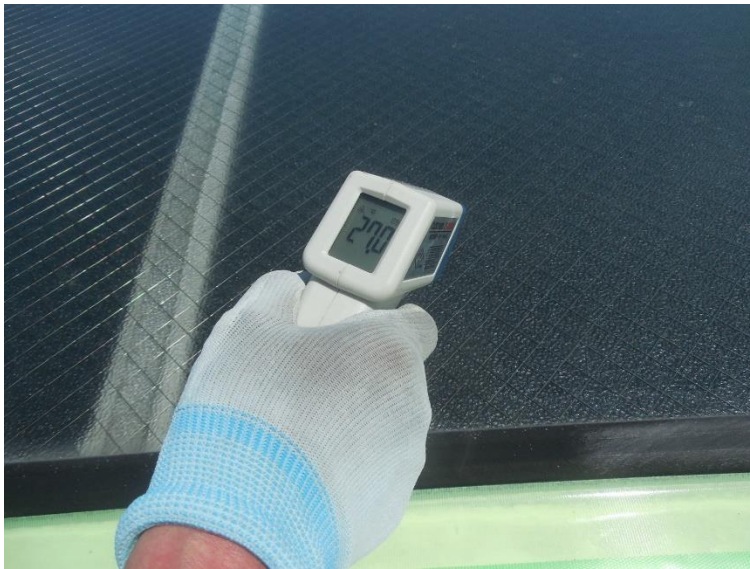

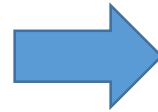

# Verification

Method of verification : Measure the temperature of the unconstructed glass and constructed glass with a radiation thermometer  
(※Outside temperature : 24°C、 weather : sunny)

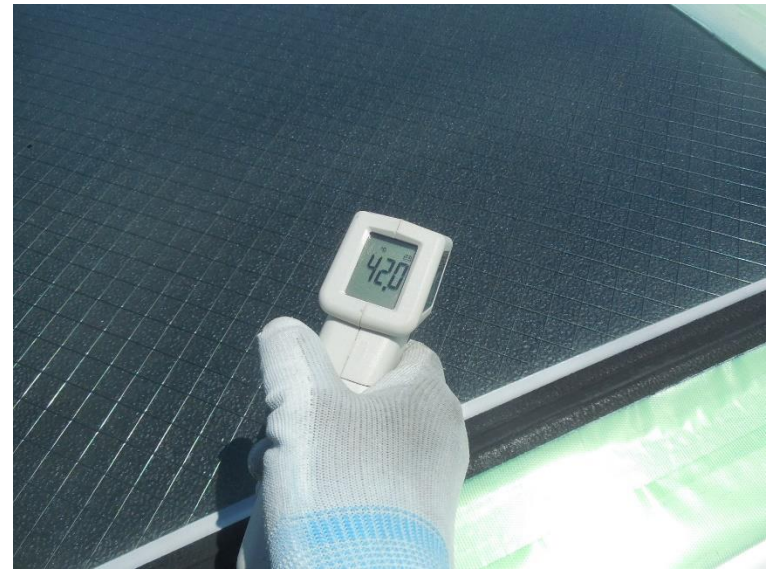

< Unconstructed glass >

27.0°C

< Constructed glass >

42.0°C

The coating film absorbs heat and greatly reduces the heat entering the room. It also blocks ultraviolet rays.
